

ENT Workstations By Atmos MedizinTechnic

Treatment units and diagnostic devices with ergonomy and functional safety.

For the ENT medicine ATMOS offers different workplace systems, which adapt to the spatial and medical conditions in practice and hospital. They can be extended problem-free by integration of additional instruments and assure highest flexibility. The quality of the ATMOS diagnostic units enjoys worldwide a good reputation. All devices correspond to the latest techniques. Innovative design and a favourable price are not mutually exclusive.

ATMOS C 21

The ATMOS C 21 combines all functions necessary for an ENT workstation in one compact, economic unit.

You, as an ENT doctor, spend most of the day at work - therefore, it is very important for you to feel good in your activity environment.

Do you agree that the central unit for ENT examination should fulfill your high demands for ergonomy and design? Also think of your patients who set a high value on a modern and hygienically clean treatment environment? Do you want to use your technical equipment for the benefit of your patients without thinking about its operation?

The special equipment of the ATMOS C 21

- one instrument deposit surface
- 2-channels-cold light
- one instrument deposit surface
- powerful, maintenance-free suction system
- open storage compartment for additional units
- 2 storage compartment pull-outs
- writing and working plate to be pulled out
- expandable by options and accessories
- excellent price / performance ratio
