

NASAL-SLING SHAPED DRESSING

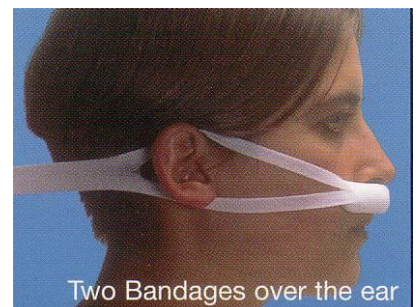

The NASAL-SLING nose bandage has a soft, cylindrical, highly absorbent, viscose non-woven padding that is covered by elastic knit fabric.

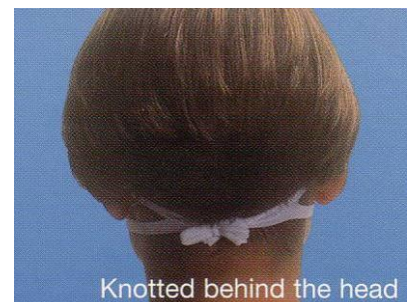

The bandage is easily fitted to the patient by passing the attached straps around the ears. The ends can be tied up at the back of the head.

The nose bandage absorbs blood and wound secretions post-operatively. Should the patient develop a cold, the absorbent pad can be moistened with essential oils, to ease breathing.

- Simple and quick to fit
- No more messing around with tape
- Patient can replace the bandage
- Packed in boxes of ten, non sterile

Two Bandages over the ear

Knotted behind the head
